Target Audience

Candidates for this exam are seeking to prove core software development skills. Before taking this exam, candidates should have a solid foundational knowledge of the topics outlined in this preparation guide. It is recommended that candidates be familiar with the concepts of and have hands-on experience with the technologies described here either by taking relevant training courses or by working with tutorials and samples available on MSDN and in Microsoft Visual Studio.

Objective Domain

1. Understanding Core Programming

   1.1. Understand computer storage and data types.
   \[This \ objective \ may \ include \ but \ is \ not \ limited \ to:\] how a computer stores programs and the instructions in computer memory; memory stacks and heaps; memory size requirements for the various data storage types; numeric data and textual data

   1.2. Understand computer decision structures.
   \[This \ objective \ may \ include \ but \ is \ not \ limited \ to:\] various decision structures used in all computer programming languages; If decision structures; multiple decision structures such as If...Else and switch/Select Case; reading flowcharts; decision tables; evaluating expressions

   1.3. Identify the appropriate method for handling repetition.
   \[This \ objective \ may \ include \ but \ is \ not \ limited \ to:\] For loops, While loops, Do..While loops, and recursion

   1.4. Understand error handling.
   \[This \ objective \ may \ include \ but \ is \ not \ limited \ to:\] structured exception handling

2. Understanding Object-Oriented Programming

   2.1. Understand the fundamentals of classes.
   \[This \ objective \ may \ include \ but \ is \ not \ limited \ to:\] properties, methods, events, and constructors; how to create a class; how to use classes in code

   2.2. Understand inheritance.
This objective may include but is not limited to: inheriting the functionality of a base class into a derived class

2.3. Understand polymorphism.
This objective may include but is not limited to: extending the functionality in a class after inheriting from a base class; overriding methods in the derived class

2.4. Understand encapsulation.
This objective may include but is not limited to: creating classes that hide their implementation details while still allowing access to the required functionality through the interface; access modifiers

3. Understanding General Software Development
3.1. Understand application life cycle management.
This objective may include but is not limited to: phases of application life cycle management; software testing

3.2. Interpret application specifications.
This objective may include but is not limited to: reading and translating application specifications into prototypes, code, and components

3.3. Understand algorithms and data structures.
This objective may include but is not limited to: arrays, stacks, queues, linked lists, and sorting algorithms; performance implications of various data structures; choosing the right data structure

NOT: algorithm analysis

4. Understanding Web Applications
4.1. Understand Web page development.
This objective may include but is not limited to: HTML, Cascading Style Sheets (CSS), JavaScript

4.2. Understand Microsoft ASP.NET MVC Web application development.
This objective may include but is not limited to: page life cycle; event model; state management; client-side vs. server-side programming

4.3. Understand Web hosting.
This objective may include but is not limited to: creating virtual directories and Web sites, deploying Web applications; understanding the role of Internet Information Services

4.4. Understand Web services.
This objective may include but is not limited to: Web services that will be consumed by client applications; accessing Web services from a client application; SOAP and Web Service Definition Language (WSDL)

5. Understanding Desktop Applications

5.1. Understand Windows Store applications.
   This objective may include but is not limited to: application lifecycle; navigation model; visual inheritance; UI design

5.2. Understand console-based applications.
   This objective may include but is not limited to: characteristics and capabilities of console-based applications

5.3. Understand Windows Services.
   This objective may include but is not limited to: characteristics and capabilities of Windows Service

6. Understanding Databases

6.1. Understand relational database management systems.
   This objective may include but is not limited to: characteristics and capabilities of database products; database design; Entity Relationship Diagrams (ERDs); normalization concepts

6.2. Understand database query methods.
   This objective may include but is not limited to: structured query language (SQL), creating and accessing stored procedures, updating data, selecting data

6.3. Understand database connection methods.
   This objective may include but is not limited to: connecting to various types of data stores such as flat file; XML file; in-memory object; resource optimization
